

16 Slot Full Size Laptop Cart

The all steel locking 16 full-size laptop cart can recharge up to 16 laptops. Each cart comes with an 18 outlet power strip which is bolted to the cart. An 8 ft, 14 gauge, 15 amp, UL connection cord provides easy wall outlet connection. A security bolted back cover protects the higher voltage connections from user disconnection. A low voltage laptop connection is presented at the front door only. Each cart has two, height adjustable shelves, with eight configurable wire slot dividers. The dividers can adjust at half inch increments. A rear shelf back plane mounts transformers and organizes cables.

The 16 Slot Full Size Laptop Cart has a built in access point holder which provides through the top antenna slots and nylon strap connection. Dual grab handles at hand and foot positions insure safe maneuvering. The cart easily transports on 5 inch casters with front brakes. An adaptive wheel design allows for eight inch air tire upgrades for outside and ramp use. The entire cart can be locked to the wall using ICR's innovative wall lock system.

on/off switch

ICR-030-LC16

*Black powder coated cart with powder coated shelves. Package size 23x20x37"
Net weight 80 pounds. Shipped ground freight from Hampstead, Md. 21074.*
