

Small/Medium Projector Tilt Shelf

Our smaller size projector shelf is capable of holding projectors up to 2000 lumens. This shelf is 12x17 inches and contains strap points, ventilation and bolt mounting holes. The base provides a pivot point and allows the shelf to rotate 10 degrees down and 40 degrees up. Mounting slots provide permanent mounting to any flat surface.

The base allows the user to tighten 2 thumb bolts on the left and right sides. This process provides unlimited adjustments up and down. The base also allows the user to adjust for tilt of axis. This adjustment is extremely useful when cart mountings are not level.

Powdercoated and aluminum finish, the tilt shelf allows smaller projectors to be permanently fixed to carts ceilings or any flat surface.

ICR-020-SPT

Shipping weight 10 pounds, package size 19x21x10,
2 metal pieces and plastic thumb wheels.
