

Rolling Computer Table

*For State Testing (Laptop or Desktop) Quick To Set Up And Roll Away.
Make a Lab Anywhere!*

Our 62" X 34" computer table is built of welded steel tubing, powder coated in black and topped with a 1" light grey laminate top. Rolls on 4" locking casters. The unique 1.5" opening in the center allows continuous access to the chase below. Fits 6 students with laptops and 4 with desk top computers. NO MORE MESSY CABLES ON THE DESK TOP. All cables can immediately be lowered into the chase area below. The 6" wide chase runs the full length of the table and allows a continuous chase when tables are bolted together to form a line up. The wire wraps on the edges, when removed, allow the tables to be thru-bolted together forming a tight sturdy work surface. Leg height is adjustable from 18" to 28".

Install power feeds and network cable connections to create a LAB line up of tables.
